ABSTRACT

This catalogue lists the oceanographic publications received by World Data Center A, Oceanography, from 1 October 1981 through 30 September 1982. It was compiled by the staff of the Literature Research Corporation.

ACKNOWLEDGMENTS

The following staff members of Literature Research Corporation assisted in the preparation of this catalogue: Richard L. Bullington, Jr., Project Leader; Christina Nassikas, editing and proofreading; Averill Laurie and Virginia Moore, cataloguing; Rose Ann Loechler and Virginia Moore, proofreading; Averill Laurie, technical typing; Nancy Lee Maloch, paste-up artist. Ronald E. Moffatt and Charlotte L. Sazama of WDC-A, Oceanography, provided technical assistance.

INTRODUCTION

The World Data Center system was established in 1957 to collect data from the numerous and widespread observational programs of the International Geophysical Year (IGY) under the principles set forth by the International Council of Scientific Unions (ICSU) and to make such data readily accessible to interested scientists and scholars. The system consists of World Data Center A (WDC-A) located in the U.S.A.; WDC-B located in the U.S.S.R.; and several WDC-C's located in Western Europe, Australia, and Japan. WDC-A is established under the auspices of the U.S. National Academy of Sciences where the Coordination office is located. WDC-A is divided into eight discipline centers whose addresses are given on pages vi and vii. These centers are located in institutions which, in the opinion of the Academy, can best serve the interests of science because of their data handling capabilities for the appropriate scientific disciplines. WDC-A, Oceanography, is collocated with the National Oceanographic Data Center (NODC) in Washington, D.C.

ICSU first assigned responsibility for the operation of the World Data Centers to its Comite Special de Annee Geophysique Internationale (CSAGI). After completion of the IGY programs, CSAGI's responsibilities were terminated in 1959. ICSU then delegated the responsibility for the operation of the World Data Centers in the post-IGY period to its Comite International de Geophysique (CIG). This function is now discharged by the ICSU Panel on World Data Centers. The framework for continued international exchange of data is set forth in the Fourth Consolidated Guide to Intergovernmental Data Exchange through the World Data Centres and the Intergovernmental Oceanographic Commission's Manual on International Oceanographic Data Exchange.

Each WDC is open to visitors and guest workers from any country; all data in the centers are accessible to visitors.

Arrangements can be made to borrow from WDC-A, Oceanography, any publication for which duplicates are available at the Center. This temporary use of publications may not exceed a period of one month, not including time of transmittal.

Copies or extracts of noncopyrighted materials may be provided on request, at a cost not to exceed that of reproduction and mailing. Details for obtaining data and information from the Center are given in the Catalogue of Data.

WORLD DATA CENTER A

World Data Center A consists of the Coordination Office and eight subcenters:

World Data Center A,
Coordination Office
National Academy of Sciences
2101 Constitution Avenue, N.W.
Washington, D.C. U.S.A. 20418

Telephone: (202) 334-3359

GLACIOLOGY (SNOW AND ICE):

World Data Center A,
Glaciology (Snow and Ice)
Cooperative Institute for
Research in Environmental
Sciences
University of Colorado
Boulder, Colorado, U.S.A. 80309

Telephone: (303) 492-5171
FTS 320-5311

ROCKETS AND SATELLITES

World Data Center A,
Rockets and Satellites
Goddard Space Flight Center
Code 601
Greenbelt, Maryland, U.S.A.
20771

Telephone: (301) 344-6695
FTS 344-6695

METEOROLOGY (AND NUCLEAR RADIATION:

World Data Center A,
Meteorology
National Climatic Center
Federal Building
Asheville, North Carolina,
U.S.A. 28801

Telephone: (704) 257-6682
FTS 672-6682

ROTATION OF THE EARTH:

World Data Center, A,
Rotation of the Earth
U.S. Naval Observatory
Washington, D.C., U.S.A. 20390

Telephone: (202) 653-1529

OCEANOGRAPHY:

World Data Center A,
Oceanography
National Oceanic and Atmospheric
Administration
Washington, D.C., U.S.A. 20235

Telephone: (202) 634-7249
FTS 634-7249

GENERAL INFORMATION

Arrangement of the Catalogue

This catalogue lists the publications received by WDC-A, Oceanography, from 1 October 1981 to 30 September 1982. To enhance the usefulness of the catalogue, suitable cross references are provided by means of keyword and author indexes.

The publications listed in the catalogue are grouped by countries of origin. Preceding each publication is an identifying catalogue number. The numbering system is designed after that used in other WDC-A, Oceanography, catalogues. The first two digits identify the originating country. The number assigned to each country is given in the Numerical List of Countries. The next two digits, after the decimal point, identify the contributing institution. The names of the countries and institutions are printed in capital letters at the beginning of each group of references, preceded at the left by their identifying numbers. In some instances, where specific institutions are not identified separately, the institution number is given as ".00." The final three digits following the dash represent the unqiue number for each document. This document sequence number is assigned in the order in which the publication is catalogued. For example, Argentina is number 01; Servicio de Hidrografia Naval is .01. Thus, the first publication listed in this Supplement has the catalogue number 01.01-111. If a publication contains data that are listed in the Catalogue of Data, that catalogue number is referenced in parentheses after the publication information. For example, after publication number 38.14-184, information appears (WDCA-138.5 B-16) which shows that this publication contains data for catalogue number 138.5 B-16 in the Catalogue of Data.

In this Supplement, the articles that appear within some journals are indexed individually following the journal entry. For example, following publication No. 04.02-009, the articles included in that publication are numbers 04.02-009.1 through 04.02-009.10. The decimal number is entered beneath the catalogue number. In cataloguing certain journals, articles not relating to the marine sciences are omitted.

In addition to serving as a means of sequencing the publications, the catalogue number constitutes a link between the indexes and the catalogue.

A brief section, which lists miscellaneous journals, reprints and reports, may follow the last institution for a particular country.

Keyword Index

In the Keyword Index, the keywords in every title are placed in alphabetical sequence in capital letters. Below a keyword, all numbers of the documents in the catalogue in which that word appears are listed.

Author Index

The Author Index gives in alphabetical sequence the names of the authors of the publications listed in the catalogue. The corresponding catalogue number(s) follows the name.
